- SQL
- DotNet
- ASP(FrameWork)
- React
- Node.js
- Word
- Excel

INTERESTS

- Drawing
- Reading books
- Create Scientific Experiments

LANGUAGES KNOWN

EXPERIENCE (TRAINEE)

14-09-2024 - Still Working	**Zencorp Techno Solutions(ZCTS)** Web Developer

EDUCATION

2023 Passed Out	**Nachimuthu Polytechnic College Pollachi** Diplamo - AUTOMOBILE 87% With First Class Distinction

PROJECTS

Phone Book Management with C#

A Phone Book Management system in C# is typically a console or desktop application where users can manage a list of contacts, each containing details like name, phone number, address, and email. This system can include features such as adding new contacts, deleting contacts, updating details, and searching for contacts

HR Management System with Python

An HR Management System is a software application that helps manage the administrative tasks of Human Resources (HR) departments, such as employee information, payroll, attendance, performance reviews, and more. Developing an HR Management System using Python is a great project to practice object-oriented programming, database handling, and creating user-friendly interfaces.

Web Project With HTML,CSS and JS

Creating a web project with HTML, CSS, and JavaScript is a great way to learn how to build interactive websites and web applications. HTML provides the structure of the page, CSS is used to style it, and JavaScript adds interactivity

Table Creating with Database

Creating a table with a database is a fundamental project that involves setting up a database and using it to store, retrieve, and manipulate data. For this project, we'll create a simple database table and use a web application to interact with it, such as displaying data and inserting new records

ARCHIVEMENT AND AWARDS

Won District level Overall Championship in Vehicle Management Scientific Experiment

ACTIVITIES

Gym Workout
Traveling
Playing Cricket
